March 11: Economic Crisis

Given all that has been going on in the US and the world since the turn into the 21st century, I frequently review the insights that have been posted (including some that have not) to keep myself in calibration, so to speak, and, frankly, to see if I have missed the mark someplace along the way. Interpretation and timing are always a challenge, but this can be adjusted as new information comes to light. In addition, I look for any linkage between the insights, which seems to occur quite often. However, what is of most concern is missing the mark entirely, as in reporting something that is not from the Lord. If this happens, I will let you know (or: you can let me know).

At any rate, what follows is linkage that involves the date of March 11, starting with a dream, moving to a natural disaster, and concluding with an economic collapse orchestrated by a pandemic. I'll list them first, followed by commentary.

As a sidenote, although the terms *financial*, *economy*, and *commerce* have different meanings, they are nonetheless intertwined. When one comes to a halt, collapses, or falters, generally the others do likewise. Consequently, these words are used interchangeably in what follows.

Also, the number **11** signifies ***disorder*** and ***disintegration***. As we will see, this is the nature of the events that follow and where we are currently. The world is in ***crisis mode***.

On **March 11, 2008**, I dreamed of the **Titanic sinking**. It was in color, and I saw its bow rising up in the air and its classic smoke stacks jutting up from its deck as it began to sink into the sea. Following this picture, I saw the year **1917** scroll before me and then the month of **May**.

On **March 11, 2011**, Japan experienced the **sixth largest earthquake in recorded history** that led to a devastating **tsunami** and nuclear reactor **meltdowns**.

On **March 11, 2020**, the **World Health Organization (WHO)** declared the so-called **coronavirus** a global pandemic that led to a **lockdown of most economies around the world**. In short order, global commerce ground to a halt.

Now, starting with the dream, the Titanic was called by some as a *nearly-invincible ship* (not quite unsinkable but formidable) and was built to be part of a fleet of the largest and most luxurious ships on the sea. However, on April 14, 1912, at 11:40 pm, it struck what is called a *blackberg*, an iceberg that looks black in the night, just like black ice, and sank shortly after on April 15.

A nearly-invincible luxury ship sinking into the sea refers to the financial system, a nearly-invincible system of great wealth (luxury), sinking among the nations. In scripture, the sea often represents the nations. What connects the Titanic to the financial system and luxury or wealth of the nations is its owner, American railroad tycoon **JP Morgan**, who was one of the wealthiest men of his time, building one of the most powerful banking houses in the world. Today, JP Morgan's name is still in financial news (i.e., **JP**

Morgan Chase, Morgan Stanley). Of special note, Morgan is credited with having saved or rescued the national economy, in general, and the federal government, in particular, on two separate occasions. Morgan's company also played a major role in yoking America, and ultimately the whole world, to a central banking system, which started in 1914 with the establishment of the **Federal Reserve System**.

Clearly, based on these few but vital facts, the sinking of the Titanic is linked to a financial or economic crisis and this, in turn, affects commerce. By the way, a ship is a symbol of commerce.

Of significance is the fact that **six months after the dream**, the world began to witness the **near-collapse of the entire global financial system**, requiring major government bailouts with lingering effects for years. Actually, the bailouts and subsequent actions did not resolve the crisis; they simply added to a looming debt crisis that is currently in the trillions of dollars and mounting.

Reminder: the number **6** signifies **man and represents his wisdom and labor**, which will come up short of the mark or glory of God. This you can take to the bank; pun intended.

There is more: the 2008 near-collapse came exactly **7 years after September 11, 2001**. If you recall, there was an initial shock to the stock market and airlines at that time. But more significantly to the long-term, the 9.11 attack resulted in the crumbling of the two symbols of **global commerce** called the **World Trade Center**. This foretold what was coming, for it was a sign of not only the 2008 financial crisis but also of the 2020 pandemic-driven economic crisis twelve years later. It is obvious that each crisis has been progressively worse, and we aren't through the current one yet.

See: *When You See the Structures Crumble* – <https://kingdomandglory.com/prophetic/p1.pdf>

We'll come back to 1917 and the month of May, but next we need to consider the Japanese earthquake and meltdown, which in turn connects to a FedEx cargo plane crashing in Tokyo.

See: *FedEx Plane Crashing* – <https://kingdomandglory.com/prophetic/p27.pdf>

Without repeating all the explanation in the above link, the take-away is that I saw an economic connection between the US and Japan, based on the cargo plane crash of March 22, 2009 and the March 11, 2011 quake/meltdown.

Here is an excerpt from another insight that brings the above together, based on the number 11.

Plainly, there is a pattern to these March events that progresses in severity from a **warning** (3.11 Titanic sinking) to a **crash** (3.22 FedEx plane) to a **cataclysmic upheaval** of the earth on two levels (3.11 Japan quake and tsunami) to a **meltdown** of a man-made structure (3.22 Japan reactor). These are all connected on a prophetic level, so we should expect to see events occurring along these lines.

Putting aside the actual years, note the 11-day intervals that seem to be in two waves: **from a warning to a crash is 11 days; from a cataclysmic upheaval to a meltdown is 11 days**. Notice the increase in intensity – a meltdown is greater than a crash. **Could it be that we are now in the second wave, which is one of upheaval to meltdown?** I've been considering the possibility that, in addition to the three 7-year cycles we've been in since 2000, there might be 11-year cycles beginning in 1999 (1999 to 2010; 2010 to 2021). If so, is there a third cycle running from 2021 to 2032?

See: *Worst Year 2021* – <https://kingdomandglory.com/prophetic/p28.pdf>

In answer to the above question (in bold): we have gone from an upheaval to a meltdown, not only on an economic level but also on one pertaining to human rights and what it means to be human in the image of God. This cannot be emphasized enough. Be alert; global, technocratic elitists are the most likely suspects driving this meltdown.

Given what we know today, I suggest that the US-Japan connection actually points to a **global commerce crisis** that officially began on **March 11, 2020**, as the WHO declared a global pandemic that has led to the literal shutdown of global commerce with devastating economic results to the most vulnerable nations, businesses, and individuals. Again, this is still in process and, based on some recent announcements, appears headed toward more draconian lockdowns across the globe (e.g., Ireland, Britain, Australia, Spain). We'll have to wait and see how far this will spread and for how long in what some are calling the coming *dark winter*.

For those of us in the US; don't think for a minute we are immune from politicians leading us into a national lockdown. During the run-up to the presidential election, it was Biden who referred to the coming *dark winter*. If the **World Economic Forum** (WEC), the **United Nations**, and other globalist organizations (e.g., World Bank, IMF) and individuals get their way (i.e., control), we can expect more, not less, restrictions to deal with something that is truly not a pandemic.

Now, what about the year 1917 and the month of May?

Well, 1917 is quite an interesting year, for World War 1 was still being fought, ending in 1918. On **March 11, 1917**, after a two-year campaign, the British Indian Army, fighting the Ottoman Turks, finally succeeded in capturing Bagdad, a region that has historical ties to **ancient Babylon**. Does March 11 signify some future conflict between good and evil – evil being likened to the beast nature of Babylon?

1917 was most notable for the **Fatima** (Portugal) visions (May 13 through October 13), the so-called **apparitions of the Virgin Mary** that are now idolized by so many in the world; the **Russian and Bolshevik Revolution**, which led to the Soviet Union; the **Balfour Declaration** (November 2) that was Great Britain's promise for a Jewish state in Palestine; and Sir Edmund Allenby of Great Britain taking control of **Jerusalem** (December 9). To say the least, 1917 stands out as a significant period in world history.

The last two events were significant in the rise of the present-day Jewish nation of Israel. Of note is the fact that the Balfour Declaration was issued to **Lord Walter Rothschild** (a leader of British Jews) and that the **modern-day state of Israel** declared their independence on May 14, 1948. The Rothschilds are known for their global banking influence and control.

Although I don't see the modern state of Israel the way most evangelicals do, based on a doctrine of dualism, I acknowledge they have a role in the events near the end of this age, just as many see the Catholic church and their current pope (some see as a socialist/communist) playing a role. So, this leaves the revolution. It is significant that the WEC and its founder Klaus Schwab are attempting to drive the world to an economic reset that Schwab calls the **Fourth Industrial Revolution**, which will join **technocratism** with **transhumanism**. This speaks of a melding of technocracy and biology and the massive collection and digitization of data (including currency) in order to transform the global economy and

ultimately the human race itself. At its root, it is all about a **fascist coup** by technocrats on a massive, global scale. To me, it has all the elements of a **Fourth Reich**.

By the way; others view what is occurring globally as a **socialist-communist coup**. Regardless of the label, an evil coup is underway.

See: *Truth Under Siege* – <https://kingdomandglory.com/art/art72.pdf>

The global pandemic is linked to the goals of this so-called *revolution*. Clearly, the pandemic is being used to get the traction the WEC needs to fulfill **its goal of absolute global economic control through technology and data**. There is a lot to this movement and it is essential for all of us to learn more about it. It can't be stressed enough how extremely dangerous this movement is to humanity and our God-given freedoms. Masks and social distancing are merely the first steps; next will be the untested vaccines, if the general population of the world doesn't stand against this tyranny. After that it is total control of our lives.

Standing for our rights as humans created to image God might just be the antitype of the 1917 revolution, only I see it being played out by anointed Christ-*abiders* through what I have been shown is a **War of Peace**. Perhaps it will be a peaceful and righteous revolution standing against an evil and unrighteous revolution. Guess who wins! Good is the victor over evil. Good wins because Christ has won!

See: *War of Peace* – <https://kingdomandglory.com/prophetic/p19.pdf>

As for the month of May, Fatima and Israel (Jewish state) are the two events that stand out. Both could be classified as "religious" events. Will there be a metaphysical crisis along these lines while there is an ongoing economic crisis? This is a wait and see!

See: *Metaphysical Crisis* – <https://kingdomandglory.com/prophetic/p103.pdf>

Based on many insights posted, I conclude that March 11 has been associated with successive crises (collapse, disorder, disintegration – leading to chaos and confusion) of commerce (finance, economy) and these events are signposts on the highway leading to the open manifestation of King Jesus and His kingdom to the nations of the world. Only God's kingdom can bring order to global economics and commerce in a way that benefits all of the human race.

The kingdom of God embodied in His Son, the King, is the only answer to what ails the human race.

Let's not forget that the kingdom of God is —

- *Universal* (all in heaven and on earth)
- *International* (all nations)
- *Interracial* (all races, ethnics).
